

Siegecraft

Art Asset Sourcing Guide

Prepared March 2026 — Free & Open-License Assets for Game Visuals

Overview

This document catalogs free art assets suitable for Siegecraft, a medieval fantasy card/strategy game built with LÖVE 2D. Each source is listed with its URL, license terms, and what it covers. All assets listed here are free for commercial use (with attribution where required).

The game needs assets across several categories: character/worker sprites, building/structure sprites, card UI frames, resource icons, backgrounds/tilesets, and visual effects. The recommendations below are organized by category with a primary pick and alternatives for each.

1. Complete Medieval Strategy Packs

These packs cover multiple asset categories in a single cohesive style, making them the best starting point for a unified visual identity.

Pack Name	Source URL	What's Included	License
Tiny Swords (Pixel Frog)	pixelfrog-assets.itch.io/tiny-swords	Free pack: 4 unit types (Warrior, Lancer, Archer, Monk), worker pawns with gathering animations, 8 buildings, 5 faction color variants, terrain tiles, UI elements, particle effects	Free for commercial use. Credit appreciated, not required.
Toen's Medieval Strategy	opengameart.org/content/toens-medieval-strategy-sprite-pack-v10-16x16	308 sprites at 16×16px: terrain, buildings, roads, rivers, soldiers, siege weapons, animated effects, GUI sprites	CC-BY 4.0. Must credit Andre Mari Coppola.
Kenney Medieval RTS	kenney.nl/assets/medieval-rtss	120 assets: RTS-style buildings, units, and terrain tiles	CC0 (public domain).
Kenney Retro Medieval Kit	kenney.nl/assets/retro-medieval-kit	Retro-styled medieval buildings, characters, and props	CC0 (public domain).

Recommendation

Tiny Swords is the strongest primary pick. It includes worker pawns with gathering animations (chopping, mining, etc.) which directly maps to Siegecraft's worker system. The 5 faction color variants align well with Siegecraft's 5 factions. The buildings cover barracks, towers, houses, and castles. Start with this pack and supplement with others for anything it doesn't cover.

2. Card UI Frames & Elements

Siegecraft renders cards at 160×220px. These packs provide card borders, frames, icon slots, and decorative elements.

Pack Name	Source URL	What's Included	License
Fantasy Card Assets (cafeDraw)	cafedraw.itch.io/fantasy-card-assets	Card frames in 5 colors (blue, red, green, yellow, grey), card backs, name holders (wood/stone/gold), portrait borders, icons, card effects	CC0. Free for commercial use.
Pixel-art CCG Frames	itch.io/game-assets/free/tag-card-game	Various pixel-art card frames available in different styles	Varies by pack.
Free Card Game Templates	itch.io/c/4145652/free-card-game-templates-and-resources	Curated collection of free card game assets and templates	Varies by pack.

Recommendation

Fantasy Card Assets (cafeDraw) is the best fit. The 5 color variants match Siegecraft's faction colors (Human=blue, Orc=red, Elf=green, Gnome=yellow/purple, Neutral=grey). The wood/stone/gold name holder variants could distinguish card tiers.

3. Resource Icons

Siegecraft has 11 resource types: food, wood, stone, metal, gold, bones, blood, ectoplasm, crystal, fire, water.

Pack Name	Source URL	What's Included	License
Resource Icons (Kutejnikov)	opengameart.org/content/resource-icons	Pixel art icons: wood, stone, rock, iron, ruby, gold, emerald, diamond	CC0 (public domain).
CraftPix Free Icons	craftpix.net/freebies/	Various free icon packs including RPG resources and items	Royalty-free. Check CraftPix license.
itch.io Icon Packs	itch.io/game-assets/free/tag-icon-s/tag-pixel-art	Free pixel art icon packs: Tiny Farm RPG, Raven Fantasy Icons, Free Pixel Foods, RPG items	Varies by pack.

Recommendation

Start with **Kutejnikov's Resource Icons** (CC0) for wood, stone, gold, and metal. Supplement from itch.io pixel art icon packs for the more exotic resources (blood, ectoplasm, crystal, fire, water). The Tiny Swords pack also includes resource-related sprites (trees, gold rocks) that work as node art.

4. Visual Effects & Particles

Combat effects (attacks, damage, spells, healing) and ambient particles.

Pack Name	Source URL	What's Included	License
Pixel Magic Sprite Effects (CraftPix)	craftpix.net/freebies/free-pixel-magic-sprite-effects-pack/	10 effects at 32×32px: healing, blink, roots, damage aura, laser, spark, charm, starfall, petrification, invisible	Royalty-free.
Particle Pack (80+ sprites)	opengameart.org/content/particle-pack-80-sprites	80+ particle sprites: fire, smoke, magic effects, hearts, sparks, electricity	Check OpenGameArt listing.
2D Spell Effects	opengameart.org/content/2d-spell-effects	10 spell effect animations as PNG sprite sheets	Check OpenGameArt listing.

5. Backgrounds & Tilesets

Board backgrounds, panel textures, and terrain for the battlefield area.

Pack Name	Source URL	What's Included	License
CraftPix Medieval Tileset	craftpix.net/freebies/free-medieval-tileset-pixel-art-pack/	Medieval pixel art tileset: surface tiles, doors, stairs, levers, windows, barrels, boxes, chests, torches	Royalty-free.
Kenney Medieval RTS	kenney.nl/assets/medieval-rtts	Includes terrain tiles alongside buildings and units. CC0 makes it safest for backgrounds.	CC0 (public domain).
itch.io Medieval Tilesets	itch.io/game-assets/free/tag-medieval-tag-tileset	Various free medieval tileset packs for strategy and RPG styles	Varies by pack.

6. Character & Worker Sprites

Animated characters for the worker-people system and card unit art.

Pack Name	Source URL	What's Included	License
Tiny Swords — Pawns	pixelfrog-assets.itch.io/tiny-swords	Worker pawns with gathering animations: chopping wood, mining gold, hunting, repairing buildings. 5 color variants. Directly maps to Siegecraft's worker system.	Free for commercial use.
LPC Medieval Fantasy Characters	opengameart.org/content/lpc-medieval-fantasy-character-sprites	Modular character sprites: shields, swords, rapiers, bows, skeletons. LPC standard format.	CC-BY-SA 3.0 or GPL 3.0.
GameArt2D Characters	gameart2d.com	Royalty-free 2D sprites including characters for RPG and strategy games	Royalty-free. Check individual terms.

7. Attribution Requirements Summary

When using assets that require attribution, include the following credits in your game's credits screen or README:

Asset	Creator	License	Attribution Needed?
Tiny Swords	Pixel Frog	Custom (free)	Appreciated, not required
Toen's Medieval Strategy	Andre Mari Coppola	CC-BY 4.0	YES — must credit + link
Kenney Medieval RTS	Kenney	CC0	No
Kenney Retro Medieval Kit	Kenney	CC0	No
Fantasy Card Assets	cafeDraw	CC0	Appreciated, not required
Resource Icons	Kutejnikov	CC0	No
CraftPix Magic Effects	CraftPix	Royalty-free	Check CraftPix terms
LPC Medieval Characters	Various (LPC)	CC-BY-SA 3.0	YES — must credit + share-alike

Suggested Credits Text

Add this to your game's credits or README:

ART CREDITS

- Tiny Swords asset pack by Pixel Frog (pixelfrog-assets.itch.io/tiny-swords)
- Toen's Medieval Strategy Sprite Pack by Andre Mari Coppola (CC-BY 4.0)

- Medieval RTS and Retro Medieval Kit by Kenney (kenney.nl) — CC0
- Fantasy Card Assets by cafeDraw (cafedraw.itch.io) — CC0
- Resource Icons by Kutejnikov (opengameart.org) — CC0
- Pixel Magic Sprite Effects by CraftPix (craftpix.net)
- LPC Medieval Fantasy Character Sprites (opengameart.org) — CC-BY-SA 3.0

8. Next Steps

- Download the Tiny Swords free pack and extract worker pawn sprite sheets for the worker-people system
- Download Fantasy Card Assets and test the card frames at Siegecraft's 160×220px card size
- Download Kenney Medieval RTS for building sprites to use in the city-builder back row
- Download resource icons and match to Siegecraft's 11 resource types, creating custom icons for any gaps
- Integrate assets into the game's assets/ directory with a consistent naming scheme
- Update this document with final asset selections and any additional packs used
